Person(s) contacted and affiliation: Michael Beshore, Powertech (USA) Inc.

Summary and Resolution of Interaction:

DRMS contacted Powertech on 2-23-10 for clarification of the ground surface elevation at core hole IN08-14-33. Michael Beshore checked Powertech's records and on 2-26-10 resurveyed the hole location, reporting that the elevation is 5404.6 feet. This differs from the elevation shown on Centennial Geologic Cross Section A-A' provided by Powertech as part of Modification MD-03; the cross section shows the elevation at the hole is 5500.3 feet. Powertech asked if a new cross section needed to be generated for submittal; DRMS stated that a new cross section was not required at this time.
