Maura and I met with Richard (and his Project Manager) to further explain the requirements of the certification for the proposed pump test with following main outcomes:

- (1) they understand certification and plan to submit treatment plans in next few weeks
- (2) the discharge to dry creek bed is one option under consideration and they want to complete UIC process with EPA before making final decision on disposal option.
- (3) they will not decide on discharge option until next spring
- (4) they do not anticipate any need for water permits from WQCD in the future
