Re: Notice of Intent (NOI) File P-2008-043, MD-03, Fourth Review Responses; Request for Extension, Centennial Project, Weld County

Dear Mr. Bird:

Powertech (USA) Inc. (Powertech) hereby requests a further extension for our response to the P-2008-043 NOI MD-03 Fourth Review completeness issues outlined by DRMS in its letter to Powertech dated March 18, 2010. Powertech was granted approval from the Environmental Protection Agency (EPA) for its Class V Underground Injection Control Permit to re-inject produced pump test water on December 3, 2010. Following appeals, the EPA decided to withdraw the final permit and re-issue a revised draft permit. EPA has reissued the draft permit but has yet to issue the final permit. Date of issuance is unknown.

Please contact the undersigned should you have any questions.

Respectfully yours,

A handwritten signature in black ink, appearing to read "Richard Blubaugh".
